Materials \$30,000 +GST**
Type: **New Opportunities / Services-Other**

Capture the opportunity to own a turnkey greenfield operation with full control over importing, distributing, and utilizing advanced infrared pothole repair machinery. Establish yourself as an industry leader and drive innovation and profitability.

From Importing , Distributing and / or Franchising: This exclusive opportunity lets you manage the entire business model. You can choose to oversee the importation of advanced technology and build a nationwide franchise network, or simply focus on importing and distributing the equipment.

Master Franchise Operation: This package provides the tools and support for establishing and running an importing and master franchise operation. Tap into the perpetual need for pothole repairs, focusing on private car parks, driveways, private roads, with possible future expansion potential into local roading.

What's Included:

Import Rights: Be the importer of state-of-the-art infrared repair machines in New Zealand.

Master Franchise Setup

Build and grow a robust network of franchisees or licensed territories

Equipment : Mobile Infrared Restoration Unit: This portable setup is equipped with cutting edge infrared restoration machinery.

Why This Opportunity?

Full Business Spectrum: Manage the complete process, from machine import to franchising or selling licensed area sales. This is your opportunity to own a business package with significant and lasting potential.

Multiple Revenue Streams

Capitalize on diverse income opportunities through this business package. Earn from franchise or licensed area sales, maximize profits from machinery sales, and enjoy continuous income from ongoing royalties. This multi-faceted approach provides a stable and lucrative financial foundation for your business.

Business Resources

Unique Opportunity:

Infrared repair technology has already proven its effectiveness in overseas markets and is now poised to revolutionize pothole repair in New Zealand. Although this technology is new to the local market, its potential to transform road maintenance is undeniable.
